

Sydney Protein Group Winter Meeting

Programme for Wednesday 16th July 2008

Session 1 (Doors open 13:50)

14:00 Richard Grant (University of Sydney)

Regulation of the splicing of a sub-class of post-transcriptional factors:
A role for ZRANB2?

14:30 Mark Larence (Garvan Institute)

Quantitative phosphoproteomics reveals a pathway of
mRNA regulation downstream of Akt

15:00 Jamie Sherman (Macquarie University)

Unique ion signature mass spectrometry:
Deterministic peptide identification

15:30 Tea break sponsored by  **invitrogen**TM

Session 2

16:00 Daniel Kolarich (Macquarie University)

Sweet antibodies

16:30 Oliver Pilak (UNSW)

Chaperonins of the cold-adapted Archaeon *Methanococcoides burtonii*

17:00 Hanna Wacklin (ANSTO)

Neutron reflectometry and biological membranes: What can neutrons
tell us about the structure and function of membrane proteins?

The Philosophy Room (S249), The Quadrangle
The University of Sydney
